EXPERIENCE

Data Scientist | RaenAi | <https://raen.ai>

02/2024 - 01/2025

- Designed and implemented APIs using Python to support backend functionality and enhance system integration.
- Built and deployed a recommendation system for e-commerce platforms utilizing Python and machine learning libraries (Scikit-learn, Pandas) that drove user engagement and sales.
- Performed data cleaning, exploratory data analysis (EDA), and statistical analysis using Pandas and NumPy to ensure database readiness and data integrity.
- Collaborated on UI/UX design to improve user experience and ensure seamless interaction with backend systems.
- Developed and deployed Large Language Model (LLM)-powered chatbot solutions to automate customer support and enhance business operations.
- Created and optimized SQL scripts to generate and manage tables for real-time dashboards and reporting.
- Conducted in-depth business analysis by developing key product metrics and performing SWOT and cohort analysis to drive data driven decision-making.
- Designed and implemented Telegram bots integrated with LLMs to provide personalized and automated solutions for clients.
- Built and fine-tuned open-source LLMs (LLaMA, DeepSeek) for local deployment, enabling cost-effective and scalable AI solutions.
