AI Engineer and Data Professional with experience in Software development, LLMs, data analysis, and automation. Proven track record of deploying scalable AI solutions and improving business metrics through data-driven strategies.

PROFESSIONAL EXPERIENCE

AI engineer | RaenAi - <https://raen.ai>

📅 02/2024 - 04/2025

- Developed and deployed Large Language Model (LLM)-powered chatbot solutions to automate customer support, employee recruitment and enhance business operations through automated AI analytics.
- Engineered 8+ AI agents and chatbots using custom prompt engineering, RAG architectures
- Designed complex multimodal workflows including but not limited to text-to-text, text-to-speech, text-to-image, speech-to-text
- Implemented, tested and improved Tree of Thought by developing iterative A/B testing of prompts, parameter tuning, and temperature scaling.
- Deployed open-source LLMs such as Qwen and Deepseek for local deployment, enabling cost-effective and scalable AI solutions.

- Worked directly with OpenAi and Huggingface API with up to date models such as ChatGPT, Dall-e and Whisper, Deepseek

Technical stack: Python, Pandas, Langchain, Langsmith, n8n, MongoDB, Streamlit

- Built and deployed a real-time recommendation algorithm for e-commerce platforms using collaborative filtering and embedding-based models. utilizing Python and machine learning algorithms that drove user engagement and sales by 50%+
- Performed data pre-processing, exploratory data analysis (EDA), and statistical analysis to ensure database readiness.

Technical stack: Python, Pandas, Scikit-learn, Matplotlib, Seaborn, plotly

- Created and optimized SQL scripts to generate and manage tables for real-time BI systems and reporting.
- Refactored Python pipelines using SOLID principles, introduced OOP patterns and improved overall system design.
- Optimized Python scripts for improved readability and reduced computational complexity

Technical stack: Python, SQL, BI tools

Data Analyst | Urgent Travel - <https://urgenttravel.ae/>

📅 01/2023 - 01/2024

- Designed and executed 5+ A/B tests for UI improvements and marketing campaigns using hypothesis testing resulting in 23% higher conversion for winning variants.
- Produced weekly diagnostic reports through visualizations that identified actionable insights weekly which helped formulate hypotheses and data driven decisions.
- Implemented cohort analysis to measure customer behavior and refine business strategies
- Created python scripts to automate business and product metric reports.

Technical stack: Python, Pandas, Matplotlib, Seaborn, Google Sheets, Google Slides

- Built 15+ interactive dashboards (sheets) tracking core metrics: payment success rates, support performance, and transaction anomaly patterns as well as KPI of sales and support staff.
- Trained 5+ support staff on data literacy and dashboard interpretation.excel
- Created documentation and guides for the support and sales teams.

Technical stack: Google sheets, Google docs

Senior Technical Support Manager | Wallet - <https://wallet.tg/>

📅 01/2022 - 11/2023

- Executed and Optimized SQL queries to trace transactions and identify failures. resolving 20+ critical discrepancies per week.
- Investigated 100+ weekly customer escalations involving failed crypto payments and balance discrepancies by correlating internal database, system logs and blockchain explorers (Etherscan/Blockchain.com etc)
- Designed and deployed KPI framework grading L1 support performance across 15+ metrics
- Maintained logs for anomaly tracking and bug patterns.
- Maintained and Updated documentation for L1 and L2 support

Technical stack : SQL, Zendesk, Jira, Microsoft 365,

Early Career:

Technical Support | M e r c u r y o - https://mercuryo.io

📅 01/2020 - 01/2020

- Investigated 50+ weekly customer escalations involving failed crypto payments and balance discrepancies by correlating internal database,system logs and blockchain explorers (Etherscan/Blockchain.com etc)
- Executed SQL queries to trace transaction lifecycle, identify data sync failures, and reconcile mismatches, resolving 15+ critical discrepancies weekly.
stack: Atlassian, Jira, SQL, Intercom
- Maintained Excel based logs for anomaly tracking and bug patterns.
- Wrote updated and maintained documentation for L1 support
stack: Atlassian, Excel

Skills & Competencies

Technical skills

Python SQL Prompt Engineering Software Development Data driven decisions Statistical Analysis

HTML CSS ORM API Linux MongoDB Web development Microsoft 360
